Hospital Clínico San Carlos

About Us

IdISSC (Health Research Institute of the Hospital Clínico San Carlos) integrates and coordinates translational biomedical research to improve the health of people. The constituent entities of IdISSC include Hospital Clínico San Carlos, which is our reference center, the Complutense University of Madrid (UCM), the Technical University of Madrid (UPM), the Health Research Foundation of San Carlos Hospital and the Regional Ministry of Health of the Community of Madrid.

UNIVERSIDAD
POLITÉCNICA
DE MADRID

IdISSC was granted as a **Health Research Institute** on May 21, 2012.

Mission

As a Health Research Institute, IdISSC fulfills its mission of promoting and supporting biomedical research and innovation activities conducted by our research groups. Our Institute contributes to the body of knowledge in the field of clinical practice and healthcare by fostering basic, clinical and translational research projects, innovation, training and acknowledgement of healthcare professionals. To such purpose, our Institute is proud of having developed a dynamic resource and capability management strategy abilities.

What We Provide

IdISSC is a multidisciplinary research entity created to perform national and international research studies aimed at improving the health of people.

We harmonize the formidable machinery that the educational, research and healthcare activity of our entities represent.

To attain its goals, IdISSC has designed an efficient governance model and strategy. Our Institute provides access to dedicated resources and facilities. Special focus is placed on translational research, thereby coupling basic research and clinical practice.

We help researchers build networks and collaborations, obtain public funding, and promote education and training. The research groups that compose IdISSC attract private funding, which potentiates innovation and development.

Research Support Units

- Flow Cytometry
- Genomics
- Experimental Medicine and Surgery
- Methodological Support
- Biobank
- Support to Innovation
- Support to Local Institutional Review Boards and Trial Coordination Teams
- Clinical Research and Trials
- Phase I and Clinical Pharmacology Studies
- Pharmacy Support
- Cellular Therapy. White Room
- Cellular Response and Function
- Clinical Research Support and Laboratory Services
- Multidisciplinary Units of the Complutense University of Madrid: <https://www.ucm.es/cais>
- Multidisciplinary Units of the Biomedical Technology Center of the Technical University of Madrid: http://www.ctb.upm.es/?page_id=59

Management Unit

- Information about funding opportunities in research
- Management of private funding programmes and open call applications
- Legal/technical/economic/tax advice
- Management of agreements (donations, contracts, partnerships)
- Support to clinical trial application processes
- Staff recruitment
- Cost and Scientific reports of ongoing research projects
- Promotion of partnerships and individualized advice to research groups
- Advice on Intellectual and industrial property rights .
