## 1. Estrategia de búsqueda bibliográfica

Se realizó una búsqueda bibliográfica en Web of Knowledge (WOK) de ISI. La búsqueda se realizó en la sección 'All Databases' con las variantes:

Clin OR Clin OR Clínico OR Univ OR Universitario OR University en Address AND S Carlos OR San Carlos en Address AND Hosp\* en Address AND Year Published = 2008. El resultado se exporta mediante Output Records seleccionando Step 1 Todos los Records, Step 2 plus Abstract y Step 3 Save to Plain Text y posteriormente desde este archivo a Excel.

## 2. Número de publicaciones según tipo

Figura 1. Número de publicaciones según tipo.

El 76% de las publicaciones científicas del Hospital Clínico San Carlos durante el año 2008 se correspondieron con artículos originales y abstracts.

## 3. Factor de impacto por tipo de publicación (JCR 2008)

Tabla 1. Factor de impacto según el tipo de publicación

Tipo de publicación	Factor de impacto	
	Total	Medio
Article	751,7	3,24
Proceedings paper	112,3	4,68
Review	50,9	1,82
<i>Total general</i>	<i>915,0</i>	<i>3,22</i>

## 4. Evolución del factor de impacto de los artículos originales desde el año 2000

En la Figura 2 se presenta la evolución del factor de impacto total de los artículos originales publicados desde el año 2000. El factor de impacto del periodo 2000-2007 se ha extraído de las memorias de investigación realizadas por la Unidad de Apoyo Metodológico del Hospital Clínico San Carlos.

La metodología empleada en la elaboración de las memorias del periodo 2000-2007 frente a la empleada en la memoria del año 2008 es diferente, circunstancia que debe tenerse en cuenta al interpretar el ascenso en el impacto del último año; las memorias del periodo 2000-2007 tomaban como unidad de análisis las publicaciones notificadas por los servicios del hospital, mientras que la memoria del año 2008 obtiene la información de búsquedas bibliográficas en bases de datos electrónicas.
